

Easter eggs

Jan shows Pádraig one half from each of four Easter eggs. Pádraig can see the shell of two of them (one white, one purple) but cannot see what is inside. Pádraig cannot see what colour shells the other two have, but can see what they have inside (one has a gift, one is empty).

Jan makes the statement that every purple egg has a gift inside.

QUESTION

Which option allows Pádraig to know for sure whether Jan is telling the truth?

- A. Turn eggs 2 and 3
- B. Turn eggs 1 and 2
- C. Turn eggs 3 and 4
- D. Turn eggs 2 and 4
