

Double date

Two couples go on a double date for Valentine's Day to a café. The café sells four kinds of drinks: water, orange juice, fizzy drink, and coffee. However, only one of each drink is left to buy. Each of the four buy one drink. The table below shows how much each person likes each type of drink. The more hearts indicated, the happier that person is with that drink.

Romeo				
Juliet				
Robin				
Marian				

QUESTION

When measured by the total number of hearts, what is the happiest the friends can be after buying the four available drinks?

- A. 11
- B. 12
- C. 13
- D. 14
